

ENORANDALL line

Diatomaceus earth for filtration

APPLICATIONS

The **Enorandall** diatomaceus earth range has been set up to cover all porosity needs. It enables to achieve, from coarse to fine types, high filtration capacity, high brightness and very good filterability index (ready for micro-filtration).

DOSAGE

0,5-2 g/l as body-feed according to the conditions.

PACKAGING

20 or 25 kg according to the type.

TYPE	APPLICATION
Enorandall flux	 very coarse, high viscosity liquids
Enorandall 1 extra	  coarse, viscous liquids
Enorandall 1	  coarse low viscosity liquids
Enorandall 3F	 fine filtration
Enorandall 7	 final filtration (pre-sterilising)
Enorandall Rosa S	 ultra - final filtration (also pre-sterilising)

Olive and other vegetable oil

Grape juice, other fruit juices, infusions

Wine, beer, spirits
