## INDUSTRIAL APPLICATION

### BENTONITE MICRO – SMALL PARTICLES FOR GREAT PERFORMANCES

Dal Cin spa, active for decades in the world of «bentonite», presents a new line of products characterized by a very fine particle size.

The new "MICRO Bentonite" range is the result of in-depth research into the basic material and application of innovative production techniques to meet the most demanding market demands.

The white color, the mineralogical purity and the rheological properties make "Bentonite MICRO" a series of first choice additives in the cosmetic, detergent, plastic filler sectors and wherever a natural mineral adjuvant is used with high suspending, thickening and viscosizing properties.
